

### Powerful, Flexible, Software Solutions to Integrate and Improve the Efficiency of your Seed Company

Answering the needs of businesses ranging from small, family-run operations to large, multi-user, multi-brand corporations.

At BSTI, we will serve your seed company with exceptional seed production management, order processing, and integrated accounting systems.

Our Seed Management Software takes full advantage of the latest technologies to optimize data integrity and speed of processing, and to allow you to easily create personalized custom reports.

We pride ourselves in offering high-end software, software features, and services, including:

- **Reliable and Persistent Customer Service**
- **Unbeatable Pricing Options**
- **Extensive Training Opportunities**
- **Systems Auditing and Management Reviews**

Our software development experience includes over twenty-five years in the seed industry, including several hundred successful system installations.

We look forward to partnering with you!

## Add Convenience and Portability to your Winery Operations

Breckenridge Seed Management Software is now compatible with smart tablets, currently featuring the **Apple iPad!**

This capability enables

- salespeople to enter, place, and create order forms, reports, and invoices from anywhere, which immediately adjust inventory levels to guarantee system integrity.
- managers to create work orders, record notes, and view real-time seed and non-seed inventory levels.
- software access from anywhere for salespeople and administrative staff to view and record data in real-time.
- sharing of data sets, reports, and spreadsheets between multiple users in multiple locations.
- multiple user login accounts with individual security clearance options.

Technologies,  
Inc.**

# Seed Management Software

SIMPLIFYING DATA MANAGEMENT IN ALL PHASES OF SEED PRODUCTION AND DISTRIBUTION

**Breckenridge Software Technologies** can help you and your business complete daily operations more efficiently, make well informed managerial decisions, and improve customer service.

## RENT, LEASE, OR LICENSE!

- **Month-to-month rent.** Unbeatable pricing options running software on our company server, with monthly "rental" fee.
- **Extended lease.** Price advantageous option for start-ups.
- **License purchase.** Software can be run on your own servers.
- Enterprise license available for purchase.

Extensive reporting across fully integrated modules provides the framework to increase efficiency and reduce the operational costs of your business.

## SALES AND MARKETING

- Arm your sales force with comprehensive customer activity details: historic, current, and on-line ordering/reporting capabilities.
- Track promotions, private events, and all other company marketing activities.
- Put computing power directly into the hands of your people who need it, wherever they are!

## PRODUCT TRACKING

- From bulk seed processing to packaged goods sales, Breckenridge Software tracks it all.
- Comprehensive inventory activity tracking fully supports all license and royalty reporting government requirements including Monsanto regulations.

## FLEXIBLE CONFIGURATIONS

- Powerful and flexible configuration options provide tailored, real-time solutions for all users.
- Fully supports: multiple business units, multiple brands, multiple locations, and multiple profit / cost centers with Sarbanes-Oxley compliance.
- Comprehensive self-audit and audit trail features assure system integrity.

Discover why our software has been implemented in more seed companies than all other operations management software systems combined!
