

### **Powerful, Flexible, Software Solutions to Integrate and Improve the Efficiency of your Winery**

Answering the needs of businesses ranging from small, family-run operations to large, multi-user, multi-brand corporations.

At BSTI, we will serve your winery with exceptional wine production management, order processing, and integrated accounting systems.

Our Winery Management Software takes full advantage of the latest technologies to optimize data integrity and speed of processing, and to allow you to easily create personalized custom reports.

We pride ourselves in offering high-end software, software features, and services, including:

- **Reliable and Persistent Customer Service**
- **Unbeatable Pricing Options**
- **Extensive Training Opportunities**
- **Systems Auditing and Management Reviews**

Our software development experience includes over twenty-five years in the seed and wine industries, including several hundred successful system installations.

We look forward to partnering with you!

## **Add Convenience and Portability to your Winery Operations**

Breckenridge Winery Management Software is now compatible with smart tablets, currently featuring the **Apple iPad!**

This capability enables

- salespeople to enter, place, and create order forms, reports, and invoices from anywhere, which immediately adjust inventory levels to guarantee system integrity.
- winemakers to create work orders, record notes, and view real-time wine and non-wine inventory levels.
- software access from anywhere for winemakers, salespeople, and administrative staff to view and record data in real-time.
- sharing of data sets, reports, and spreadsheets between multiple users in multiple locations.
- multiple user login accounts with individual security clearance options.
